x-span results, llc Launches Site Decision Systems™

Durham, NC –February 5, 2008 - x-span results, llc introduces Site Decisions Systems™, a suite of analytical services and systems to support location analysis for retail, restaurant, financial, and real estate organizations. SDS includes both desktop and web-based services. Each installation is customized to the organization's process and incorporates many types of decision models to project demand, potential, impact and risk.

SDS is designed to help real estate managers and marketing strategists manage site-based efforts in a timely, consistent manner. The service is available on per use, subscription or full-service basis. x-span results helps users select and implement models, analogs and business rules as well as reporting outputs. "SDS provides a quick, yet meaningful way to understand the dynamics of an opportunity," said Tracy Nagel, Partner, "Our clients appreciate SDS' flexibility as opposed to a one-size fits all or shrink-wrapped solution."

x-span results, llc, established in 2000, provides a broad range of industry leading, business intelligence solutions focused on real estate, marketing and sales organizations. Its reach across industries offers an objective perspective into various site management and direct marketing challenges. Solutions center on the right mix of process, information and technology to support a forward-moving, decision-centric business environment.
